

Bug name	Bug description	Expected behavior	Status	Comment
Bootstrap version change code break	<p>The bootstrap version used in the project was changed to version 4.6.0 The version used to be version 5.0 but since it was a beta version, it was decided that we should move to a more stable version</p> <p>This means Sprint 1 features need to be re-coded with bootstrap 4.6.0 CSS</p>	Some buttons are now misplaced and warped + some javascript functionality from bootstrap 5 no longer works on bootstrap 4 (modals)	Fixed	
Edit button for parts returns 404 Not Found	Edit button does not update the target part.	The user should be redirected to the inventory page with the updated part.	Fixed	
Database seeders	Database seeders were not working properly	The database should be shown	Fixed	
Job's default seeder	Default seeder was displaying the value of 'active'	An expected value of either 'queued'	Fixed	
Wrong value name	Status could not be fetched since it was written as status_type	The user should be able to see the status he has chosen	Fixed	
UserFactory contains incorrect columns.	UserFactory does not reflect the current layout of the User Table in the database.	No errors when performing tests that utilize User::factory()->create()	Fixed
